

Welcome to Towcester Equine Vets

Thank you for registering with Towcester Equine Vets.

On behalf of all at Towcester Equine Vets, we would like to welcome you and your equine to the practice.

This pack coupled with our website www.towcester-vets.co.uk have been designed to provide clients with important information about our services.

About your vets

We have a dedicated and very experienced team of **equine vets** who are passionate about delivering gold-standard care to both horse and owner, providing a tailored service and communicating all treatment options comprehensibly.

There are two clinic locations dedicated solely to our equine customers with fantastic facilities at each site. From the original Paulerspury clinic at Plum Park Farm near Towcester and the most recent expansion at Onley Grounds Farm near Rugby, we work together to ensure the best treatment

possible for each client. Whatever the situation, whether it's a professional yard or a companion pony, we endeavour to make sure all therapeutic options are discussed. We can tailor our service and together decide on a treatment plan that is best for you and your horse. If you wish to visit the clinics there is more information on our '**find & contact us**' page on the website; one of our team would be happy to arrange a tour of the facilities.

We offer your horse veterinary care at any time of day with our own out of hours and emergency service. With a collaborative

approach to cases, our team can also offer internal referrals to experienced orthopaedic vets, dental surgeons and advanced practitioners in both internal medicine and equine surgery. Externally, we have fantastic connections to some world-renowned surgeons; we benefit from their expertise in diagnostic image interpretation and procedures being performed at our facilities.

Our equine vet ambulatory services cover Northamptonshire, Warwickshire, Buckinghamshire, Bedfordshire, Oxfordshire and Leicestershire.

Welcome to Towcester Equine Vets

Our services available to you

Our services available to you

Our team can offer a wide range of equine veterinary services, all individually tailored to suit you and your horse. As a registered Tier 2 Equine RCVS accredited practice, we are able to provide first-opinion veterinary consultations through to hospitalisation and surgical procedures.

Our links to external specialists, and our on-site and mobile facilities, mean we can serve the companion pony through to the elite showjumper and every horse in-between.

- **Zone Visits** – reduced call out fee days in your area for routine appointments
 - **Emergencies** – 24 hour call out, nursing care with inpatient facilities in clinic
 - **Colic** – vets to attend, treat, monitor and provide hospitalisation if required
 - **Dental** – from routine dental care to extractions, caries restoration and more
 - **Lameness** – poor performance reviews and lameness investigations in clinic or at a location of your choice
 - **Laminitis** – prevention advice, diagnosis, treatment, monitoring after care & management
 - **Surgery** – internal surgeons and surgical referral service to various specialists who can attend our clinics
- **Pre-Purchase Vettings Exams** – both 2 and 5 stage examinations carried out at either clinic or your location choice
 - **Breeding** – an experienced team dedicated to the breeding season to advise and assist you with both broodmare and stallion services
 - **Repeat Prescription Requests** – we can post or email your prescription enabling you to purchase medication online
 - **Client Information Evenings Events** – throughout the year we host various informative events with a range of topics and guest speakers/specialists

For more information on our services please visit the website where you will find further details on all the above, if you have any additional questions contact our team who will be happy to help with your enquiry.

About your Vets

Second opinions

We understand that seeking treatment can be a stressful time and that you may wish to seek a second opinion from another veterinary surgeon or practice. If this is something you wish to do, please let us know so we can ensure that all clinical history and diagnostic images are forwarded promptly. Always feel open to talk to your clinician about further treatment options and if referral is appropriate. We will be happy to guide you through the process.

Emergency & inpatient care facilities

Emergency & inpatient care facilities

24-hour service

The emergency service is provided by our strong team of experienced equine vets and nurses which helps to provide you and your horse with the best care possible either at our clinics in both Towcester & Onley or at your yard. Emergency services are provided by the practice vets that you meet on routine visits, so rest assured that it will be one of our valued team members that treats your horse.

We consider the following conditions to be emergencies:

- Colic
- Acute, severe lameness
- Lacerations & puncture wounds
- Eye trauma
- Reproductive emergency

Our out of hours service can be reached on the same number as during working hours:

- Towcester (Plum Park Farm, NN12 6LQ)
01327 811007
- Onley (Onley Grounds Farm, CV23 8AJ)
01788 523000

In rare circumstances you may reach the voicemail of the vet on call; this is usually because they are currently dealing with an emergency. Please feel free to ring the alternate clinic number and another vet should be able to talk to you as soon as possible.

Out of hours service operates between 6:30pm and 8:30am weekdays, and before 9am and after 12pm on Saturdays. An additional out of hours fee is charged to the normal visit fee and consultation.

If your horse does require a period of hospitalisation they will be monitored around the clock at our comprehensive inpatient facilities at the Paulerspury site. We make sure our inpatients are kept as comfortable as possible, with the best standard of care and monitored by our experienced team. We will provide you with daily updates of your horse's condition and answer any questions you may have whilst you visit your horse.

The inpatient yard contains spacious loose boxes, which are fully lined with rubber matting and dust-free shavings. Fixtures to permit constant intravenous fluid therapy are fitted throughout and CCTV cameras are positioned to support 24-hour patient monitoring and enhance security. Please note whilst there are people who live on site, a member of the veterinary team is not necessarily present throughout the night.

Veterinary Surgeon Abigail Jennings
BVMedSci (Hons) BVM BVS (Hons)
CertAVP(EM) MRCVS takes overall
responsibility for inpatient care. She is assisted by our nursing care team and veterinary interns who perform the routine clinical checks and management duties.

Managing the cost of emergency or inpatient care

Emergency & inpatient care facilities

There is more information on insurance, discharge and payment for treatment on the website or within the 'Common Procedure Prices' section of this document. We aim to make hospitalisation as stress free as possible for you and your horse. A clear understanding of associated protocols and administration can help with this. Please note it is the horse owner's responsibility to inform your insurance company of the veterinary treatment being undertaken. Payment in full is required on collection of your horse unless prior arrangements have been made with the accounts department.

We are happy to provide estimations or quotes at any time, but especially before more extensive treatments or procedures so it's easier for the owner to budget and allow for these costs. Our complimentary insurance administration service is there to help you process your claims so please ensure you have read through your individual policy for your horse and provide a signed claim form promptly.

Access to our facilities at either clinic

Access to our facilities at either clinic

Our Paulerspury clinic near Towcester and Onley site near Rugby both offer purpose-built facilities staffed by an experienced and compassionate team.

We also have a range of portable diagnostic and therapeutic equipment to treat your horses on-yard if required.

Towcester Equine Vets @ Paulerspury

- Purpose-built treatment rooms
- Stocks for standing procedures
- Surgical theatre with 2 knockdown boxes for surgeries completed under general anaesthesia, with a state-of-the-art table and monitoring equipment
- Separate imaging rooms
- Stallion collection room with fixed dummy and mare teaser box
- Reproductive suite with purpose-built stocks for the mare and foal
- In-house laboratory
- Dispensary
- Trot up area
- Menage
- Hard surface for lungeing
- 5 day boxes
- 4 overnight inpatient boxes with the capacity for intravenous fluid therapy and intensive care
- Isolation facilities
- Hard standing for lorry parking

Towcester Equine Vets @ Onley

- Large purpose-built treatment room
- Stocks for standing procedures
- In-house laboratory
- Dedicated x-ray room
- Dispensary
- Trot up area
- Hard surface for lungeing
- Use of 3 Andrew Bowen surface arenas
- 3 day boxes
- Hard standing for lorry parking
- Café on site

Managing the cost of emergency or inpatient care

Requesting Prescriptions

Requesting prescriptions

Prescriptions are available from both clinics. You may obtain relevant veterinary medicinal products from your veterinary surgeon or ask for a written prescription to obtain these medicines from a pharmacy or another veterinary surgeon. Your veterinary surgeon may prescribe relevant veterinary medicinal products only following a clinical assessment of an animal under his or her care.

A prescription may not be appropriate if your horse is an in-patient or immediate treatment is necessary. You will be informed, on request, of the price of any medicine that may be prescribed for your horse.

Please allow 48 hours notice for all prescription requests.

As per our professional code of conduct, it is our practice policy to reassess an animal requiring repeat prescriptions for supplies of relevant veterinary medicinal products every six months, but this may vary with individual circumstances.

Re-checks for repeat medications may be arranged on Zone visits.

To request your prescription please complete this **online form** or email **reception@towcesterequine.co.uk** Alternatively you can also call the clinic within our opening hours.

Lameness and poor performance

Our orthopaedic team take a modern approach to diagnosing lameness in horses, using evidence-based medicine, working with our clients to achieve the best desired outcome. With portable equipment, purpose-built facilities and many years of experience, clients trust Towcester Equine Vets to keep their horses moving comfortably, we provide and can explain various options to achieve this.

Certain instances of lameness in horses present in a recognisable and repeatable manner, however a complete and thorough clinical examination is carried out which involves the following;

- The horse is walked and trotted in a straight line, assessing movement in front and behind and evaluation of footfall, movement and straightness.
- All 4 limbs undergo a flexion to identify subtle lameness and provide additional information about the nature of the lameness.
- Lungeing on a hard and soft surface to assess your horse's movement on a circle.
- Examination under saddle if necessary to observe changes in head carriage, poor upward/downward transitions or tail swishing through transitions.

Full lameness investigations and performance reviews ideally need to be completed on site at one of our equine clinics. We have the appropriate facilities at both our Towcester and Onley clinics including access to a large treatment room, a separate X-ray room, suitable hard and soft surfaces for lungeing and also an area for trot-ups and flexion tests.

We are happy for owners to be part of the lameness/performance assessments however, if work or other commitments do not allow this, our experienced equine nursing team are more than happy to ride on your behalf for the ridden assessment. We have a selection of competent, sensitive riders who help the vets to assess the horse's gait whilst under saddle. These assessments can also be recorded.

Estimating the length or cost of complex lameness evaluations is difficult as each case requires a tailored approach, however estimates can be provided as a guideline.

AI Gait analysis

The Sleip app provides an additional insight into our lameness examinations. Using markerless diagnostic technology, the app uses videos of our patients moving in a straight line and on the lunge to analyse the gait. A report is created which not only allows us to keep a record of the level of lameness over time, but is also useful when performing diagnostic analgesia (nerve blocking). This allows us to refine our diagnostic and therapeutic treatment options as it can pick up subtle changes and is particularly useful for complex/multi limb lameness. It should be noted that the app is not designed to be used on its own, but in conjunction with veterinary observation.

More Information on our diagnostic equipment, lameness days and facilities can be found on our website or you can contact us to request a call back from one of our orthopaedic vets.

Estimates/quotes

Please call or email the team if you would like any guide prices on other treatments, procedures or surgery options.

Types of surgery available

An extensive range of surgical procedures can be performed at our Plum Park clinic by our experienced equine surgeon **Michele Greco** PhD CertAVP(ESO) CertAVP(ESST) MRCVS or visiting veterinary specialists as required. Procedures can be performed both under general anaesthesia and standing sedation and are listed below (albeit not an exhaustive list). Please talk to one of our vets if you would like to find out more about a surgical procedure. Horses requiring colic surgery are referred for exploratory laparotomies.

Purpose-built surgical facilities and recovery boxes have been created at our Paulerspury clinic in order to ensure that safest possible surgical environment is catered for. We also have a selection of inpatient stables and padded stocks, plus a large treatment room and x-ray room to ensure that we can complete any necessary diagnostics before surgery.

Our team understand what a daunting prospect your horse having surgery can be. Our equine vets will help you understand the procedure and answer any questions you may have beforehand during a pre-surgery appointment. Following surgery, a dedicated team will monitor and care for your horse until they are ready to return home; this includes monitoring vital parameters to make sure any post-operative complications are identified and managed swiftly. When your horse is ready to return home, a discharge appointment will be booked with the treating vet. A written surgical report and detailed discharge instructions for ongoing management are provided to advise you regarding home care.

Common procedure prices for 2025

Laparoscopy

This technique allows the surgeon to visualise the abdominal cavity in the standing horse, thereby eliminating the risks of a general anaesthetic. Procedures using laparoscopy include abdominal rig castration, ovariectomy and intestinal biopsies.

Spinal

We can perform surgical treatment for impinging dorsal spinous processes of the lumbar vertebrae in the back (commonly known as 'kissing spines') as a standing procedure. Following diagnosis, our vets will be able to talk you through the different medical and surgical options available for horses who have 'kissing spines' including bone resection (ostectomy) and transection of the interspinous ligament. In the immediate post-operative period, horses are hospitalised and benefit from ice and laser therapy to aid the healing process.

Endoscopy

This is a minimally invasive surgical technique used to examine joints (arthroscopy), tendon sheaths (tenoscopy) and bursae (bursoscopy). The technique is used as both a diagnostic aid, enabling visualisation inside a joint to assess cartilage surfaces and associated ligaments, and in the treatment of joint disease, such as joint infections, and the removal of bone chips in osteochondrosis dissecans (OCD).

Sarcoids

Laser sarcoid removal can be performed both standing or under general anaesthesia, depending on the anatomical location of the lesion(s) and temperament of the horse. There are numerous treatment options for sarcoids including topical creams, laser removal, electrochemotherapy and photodynamic therapy. If your horse has sarcoids, feel free to contact us to discuss which options may be right for you and your horse.

Terms & Conditions

Our commitment to you

We aim to provide you with a first-class service and the highest standards of treatment and care for your animals.

Our fees

Our professional fees are determined by the time spent on a case and the drugs, resources, materials, and consumables used. All fees, consumables and drug charges are subject to VAT at the current rate. We are always happy to provide written estimates for any procedure should you require one, however please bear in mind that any estimate we provide can only be approximate, as often an animal's illness will not follow a predictable or standard course.

Our payment terms

- All new clients will be asked to pay in advance for treatment & services until we have established a good payment history with yourselves.
- We will request payment in advance for certain services, such as vettings or large surgical procedures.
- Once a payment history has been established payment is due within 14 days of the date of the invoice (excluding those services & surgical procedures where payment is due in advance).
- Clients with outstanding/overdue charges will be asked to clear their account before any further treatment can be provided. If charges have been outstanding for some time, we may also request you pay for future treatment in advance.
- Clients who are persistently late in paying will also be required to pay all fees in advance or at the time of treatment and access to our veterinary services may be withdrawn.

- To offset the cost of late payment to us and to minimise the risk to our service levels, we will charge all clients a non-deductible administration charge of £15.00 on invoices that remain unpaid after 28 days from the date of the invoice.
- If your horse is admitted to hospital you will be asked to pay a deposit towards treatment within 24-hours of their arrival. All hospital patients are asked to pay their remaining balance on collection unless other arrangements have been agreed with the Towcester Equine Partner in charge of the case.
- If an outstanding balance is not paid within 60 days of any treatment and no formal arrangement to discharge the debt has been agreed, we will refer the debt to our debt collection agency & withdraw our services. Further charges may be levied in respect of costs incurred in collecting the debt.

Payment methods – making it easy for you

Our aim is to make payment as easy as possible for you. You may settle your account using:

- CASH
- CREDIT/DEBIT CARD in person or over the phone (Switch, Solo, Mastercard, Visa & Delta – we do not accept American Express)
- **Online** or by bank transfer

Sort Code: 30-18-83

Account: 00268882

Reference: please use your invoice number or account number

Inability to pay

If you are aware in advance of treatment that you will be unable to settle your account within our payment terms, please appraise the vet at the time of treatment.

If you find yourself in the unfortunate position of being unable to pay your account following treatment, please immediately contact our Client Account Manager (contact details below) to discuss the situation.

Complaints

Whilst we hope our service does not give you cause for complaint, if you do wish to complain please make contact with one of the partners and our Client Account Manager in the following way:

Towcester Equine Vets
Plum Park Farm, Paulerspury
Towcester
Northamptonshire
NN12 6LQ
Email: accounts@towcesterequine.co.uk
Telephone: 01327 811007

All complaints will be acknowledged within 48 working hours. After full investigation a formal response will be given normally within 7 working days.

Feedback

We are always pleased to receive feedback on the service we provide. Please forward this to the Client Account Manager using the above contact details.

Terms & Conditions

Disputes

Any dispute with the fees/service presented must be put in writing to our Client Account Manager (using the above contact details) within 14 days of receiving the invoice.

Where any dispute is not proven and as a result the payment is late, the overdue accounts procedure will become effective. Therefore, clients are always advised to settle their invoice on time and if there is a dispute this payment is made without prejudice.

Health insurance and liabilities

Liabilities: Towcester Veterinary Centre accepts no responsibility for accidents or incidents that occur whilst any equine is under our care. It is the owner's responsibility to provide your own insurance cover.

Insurance

Towcester Veterinary Centre strongly supports the principle of insuring against expected illness or accident. The role of the insurance company is to reimburse you for fees incurred for veterinary treatment. Even when insured, your veterinary charges and fees must be paid by you initially and are due for payment as per the above terms. Please then claim the fees from your insurance company.

Under specific circumstances we can arrange for Insurance Companies to make payment directly to us. This arrangement must be agreed with us before or at the time of treatment and with your insurance company. We will request that you make a payment to cover your insurance excess at the time or prior to required treatment. We cannot guarantee that your insurance company will cover the costs of treatment and you are therefore encouraged to contact the insurance company to verify cover before any treatment has been administered. Many policies insist on this and failing to do so will invalidate your policy.

Livery yards/training stables

Please ensure that you have made a suitable agreement with the livery/training yard owner that gives them permission to call the vet on your behalf and authorise treatment for your horse. Our Policy for horses on livery/training yards is to invoice the animal's owner directly.

Where livery yard/stables do arrange a veterinary service or purchases of goods from us with your prior agreement, it is assumed that permission has been given by you for this service or goods to be provided. If this is the case, you will be invoiced and responsible for prompt settlement of that account.

If you have a written agreement with the yard/training stable that invoices will be initially settled by the yard/training stables, then that livery yard/training stables is responsible for ensuring accounts are settled on time. They also become liable for any late payment action. Their terms and conditions for this service is between you and them and not the responsibility of Towcester Equine.

Passports

All horses, ponies, donkeys and mules must have passports which should be available to our vets to check. We strongly recommend that passports are signed by you the owner to confirm that the horse is not for human consumption to allow a wider range of medications to be prescribed. If a passport is not available, a detailed record of your equine's medicinal products must be retained. As a reminder to all clients we ask that when travelling horses to the clinic the correct passport needs to be provided on request.

Ownership of your records

Although we are treating your animal, all case records, x-rays, scans and similar documents are the property of, and will be retained by, Towcester Veterinary Centre. Whilst you are free at any time to see these records and even though a charge may be made for the investigations and interpreting the results, ownership of the resulting record e.g. an x-ray or ultrasound scan remains the property of the practice. Upon request, copies of records with a summary of the horse's history will be passed to another Veterinary Surgeon taking over your horse's care and treatment.

Termination of services

You may ask us to stop caring for your animal/s at any time.

We may withdraw our services if:

- you fail to settle your account on time
- the relationship between you and the practice breaks down
- we are prohibited by law from doing any further work on your case

Under these circumstances, we will provide you with notice in writing to seek alternative veterinary care.

Variation in Terms and Conditions of business

No addition or variation of these conditions will bind the practice unless specifically agreed in writing by a Towcester Veterinary Centre Partner. Additionally, no agent or person employed by or under contract with the Practice has the authority to alter or vary these terms and conditions in any way.

Data protection summary

Our guarantee to you: we will only use client details for the purpose of our business. We will not intentionally pass, without your permission, any details on to 3rd parties. We will aim to accurately maintain your contact preference details on our databases. Please see our full Privacy Policy displayed on our website.

Your responsibility: you will provide us with correct and updated personal information to allow us to provide our services to you in a timely and efficient manner.

How we store your data:

We store all your personal data on our secure practice management system 'Eclipse'. This can only be accessed by employees with a login. Our servers are kept onsite at both our Towcester Vets and Towcester Equine Vets branches in locked cabinets which can only be opened by authorised employees. On occasion (when experiencing technical difficulties) a member of staff from Eclipse will need to remotely access the system to help our employees, however they are acting under a confidentiality contract which restricts them from using the data.

How we use your data:

Your data is used every time you call or visit to discuss your account, book in an appointment for your animal, ring to pay an invoice, request a copy of your animal's clinical history or to edit your personal information, such as address changes. We will often ask you to confirm a certain detail of your personal information to ensure we do not discuss any account with unauthorised personnel. Please note it is our client's responsibility to keep their data up to date and not doing so means you are in breach of our Terms of Business contract.

Email marketing:

We send the following marketing communications to our clients:

- News from Towcester Equine Vets
- Information on animal welfare, like top tips for exercise and health checks you can do yourself
- Promotions and the latest related product offers

The personal data that we process for these communications is first name and email address.

Our clients find these communications useful in administering care to their pets and livestock and to keep up to date with what is going on at the practice.

We would like you to enjoy these communications but if you prefer to stop receiving them it's important to note that you can opt-out at any time by clicking the 'Unsubscribe' link in any marketing communications email.
